PHONIC ARTICULATION

DVD PHASE 2 : ARTICULATING PHONEMES

Blending

- Merging the individual phonemes together to pronounce a word.
- To read unfamiliar words a child must recognise (sound out) each grapheme, not each letter, then merge the phonemes together to make a word.

Segmentation

- Hear and say the individual phonemes within words.
- In order to spell, children need to segment a word into its component phonemes and choose a grapheme to represent each phoneme.
