

Southwood Infant School

The Green Team

We have just started on the path to become an Eco-School. We have appointed a 'Green Team', led by Mrs **Kinsella**, which is made up of 2 children from each class. The team meet regularly and discuss changes that we can make to make our school greener and limit our impact on the environment. Our first action is to tackle recycling within school.

The Eco-Schools programme will improve pupils' skills, raise environmental awareness, improve the school environment and also create some financial savings for our school.
